HEM-7194T1-FL

Clinically advanced BP monitor which also detects Atrial Fibrillation (AFib) for early stroke prevention

High risk patients who are taking regular medications for heart related diseases including stroke

Automatically Screens for AFib with every blood pressure check with 97% Accuracy²

Atrial Fibrillation (AFib) is a heart rhythm disorder characterized by rapid and irregular heartbeats. AFib can increase the risk of stroke and heart failure.

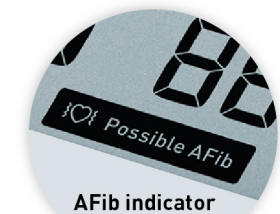

AFib increases the **RISK OF STROKE** by

5x³

Effective Treatment of AFib may **REDUCE THE RISK OF STROKE** by

66%⁴

Possible AFib Detection + Blood Pressure Measurement

AFib indicator

1 in 4 adults over 40 will develop AFib in their lifetime⁵

MRP : ₹4290/-

Intelli sense AFib

Intelli sense

OMRON's unique Intellisense® technology is designed to deliver accurate, and comfortable blood pressure measurements by intelligently controlling both cuff inflation and deflation.

Intelli sense AFib

Intellisense AFib is developed using AI technology and analyzes changes in arterial pressure to detect specific heartbeat patterns associated with AFib.
